

Testing

headspace Toowoomba is now able to offer an educational and testing service to young people and aged 2.5 to 25.

This service is aimed at those young people who may be having educational and co-occurring developmental/behavioural challenges at school or the workplace.

The assessments can be used to identify cognitive strengths and weaknesses and support diagnoses of intellectual disability.

In combination with these assessments we also have assessments which can identify Specific Learning Disorders.

Date

Wednesday and Thursday
